ABOUT THE DATA

The Utah State Board of Education provided the free and reduced-price meal raw data and meal counts used in the report. All data are from school year 2014–2015. School breakfast participation rates were analyzed using the Food Research & Action Center’s School Breakfast Calculator.² The data has several limitations. All data collected is self-reported from school districts. Qualitative data is collected annually at the beginning of each school year and may not be updated when districts make changes after the beginning of the school year. Eligibility data is based on the last operating day of October for all schools, which may not be representative of the whole school year for some schools. Enrollment data used in calculations of average daily participation may include some students who may not have access to SBP and/or NSLP (for example, split kindergarten sessions that are only in session after lunch). Data collection on alternative service models began during school year 2014–2015 and may not be representative of actual service models during that school year. Where the data were unavailable in the examined school year, data from 2015–2016 were used. Several school districts also participated in a school breakfast expansion grant provided by Utah State Board of Education in 2014–2015. These districts are: Alpine, Beaver, Canyons, Carbon, Emery, Granite, Jordan, Kane, Nebo, North Sanpete, Ogden, Provo, Tooele, Washington, and Weber. It is also important to note that districts followed different implementation timelines under this grant, i.e., some districts may not have implemented the breakfast expansion project funded through this grant as of the last operating day in October of that school year, and others may be capturing increased participation in SBP as a result of earlier implementation. Charter schools, alternative schools residential child care centers, and schools for students with severe disabilities were not included in the analysis.

TABLE KEY

% F/R: Percentage of students in school or district eligible for free or reduced-price (F/R) meals based on reports from October 2014.

% F/R Students Participating in SBP: The number of students on a free or reduced-price (F/R) meal plan that ate school breakfast each day for every 100 students on a free or reduced-price plan that participated in lunch.

Rank: The order, from highest participation to lowest participation, schools and districts rank in school breakfast participation.

Additional Students Eating Breakfast: Number of additional students who would receive school breakfast at a free or reduced-price rate if the school was reaching 70 students at breakfast for every 100 students who received lunch at a free or reduced-price rate. The Food Research & Action Center has established that a successful School Breakfast Program (SBP) is one that reaches 70 low-income students for every 100 low-income students who participate in the National School Lunch Program.

Additional Federal Funding: The amount of additional federal dollars schools and districts would have received in the 2014–2015 school year if students who are on a free or reduced-price meal plan participating in school lunch also participated in the district's SBP.

Offer Breakfast at No Charge: The method schools or districts offering school breakfast to all students, free of charge, is listed here (2014–2015). If your district information is incorrect, please notify the Utah State Board of Education Child Nutrition Programs so the system can be updated.

Alternative Service Models: The method schools or districts served school breakfast using an alternative serving model during the 2014–2015 school year is listed here. If your district information is incorrect, please notify the Utah State Board of Education Child Nutrition Programs so the system can be updated.

Marketing: The marketing strategy schools or districts used to promote school breakfast during the 2014–2015 school year is listed here. If your district information is incorrect, please notify the Utah State Board of Education Child Nutrition Programs so the system can be updated.

NA: Indicates no SBP operating at school.

Goal Met: School met goal of at least 70 percent of students on a free or reduced-price meal plan participated in SBP for every 100 students on a free or reduced-price plan that participated in lunch.

***** Indicates schools that received a Breakfast Expansion grant from the Utah State Board of Education in 2013.

Rank: The order, from highest participation to lowest participation, schools and districts rank in school breakfast participation.

Additional Students Eating Breakfast: Number of additional students who would receive school breakfast at a free or reduced-price rate if the school was reaching 70 students at breakfast for every 100 students who received lunch at a free or reduced-price rate. The Food Research & Action Center has established that a successful School Breakfast Program (SBP) is one that reaches 70 low-income students for every 100 low-income students who participate in the National School Lunch Program.

Additional Federal Funding: The amount of additional federal dollars schools and districts would have received in the 2014–2015 school year if students who are on a free or reduced-price meal plan participating in school lunch also participated in the district's SBP.

Offer Breakfast at No Charge: The method schools or districts offering school breakfast to all students, free of charge, is listed here (2014–2015). If your district information is incorrect, please notify the Utah State Board of Education Child Nutrition Programs so the system can be updated.

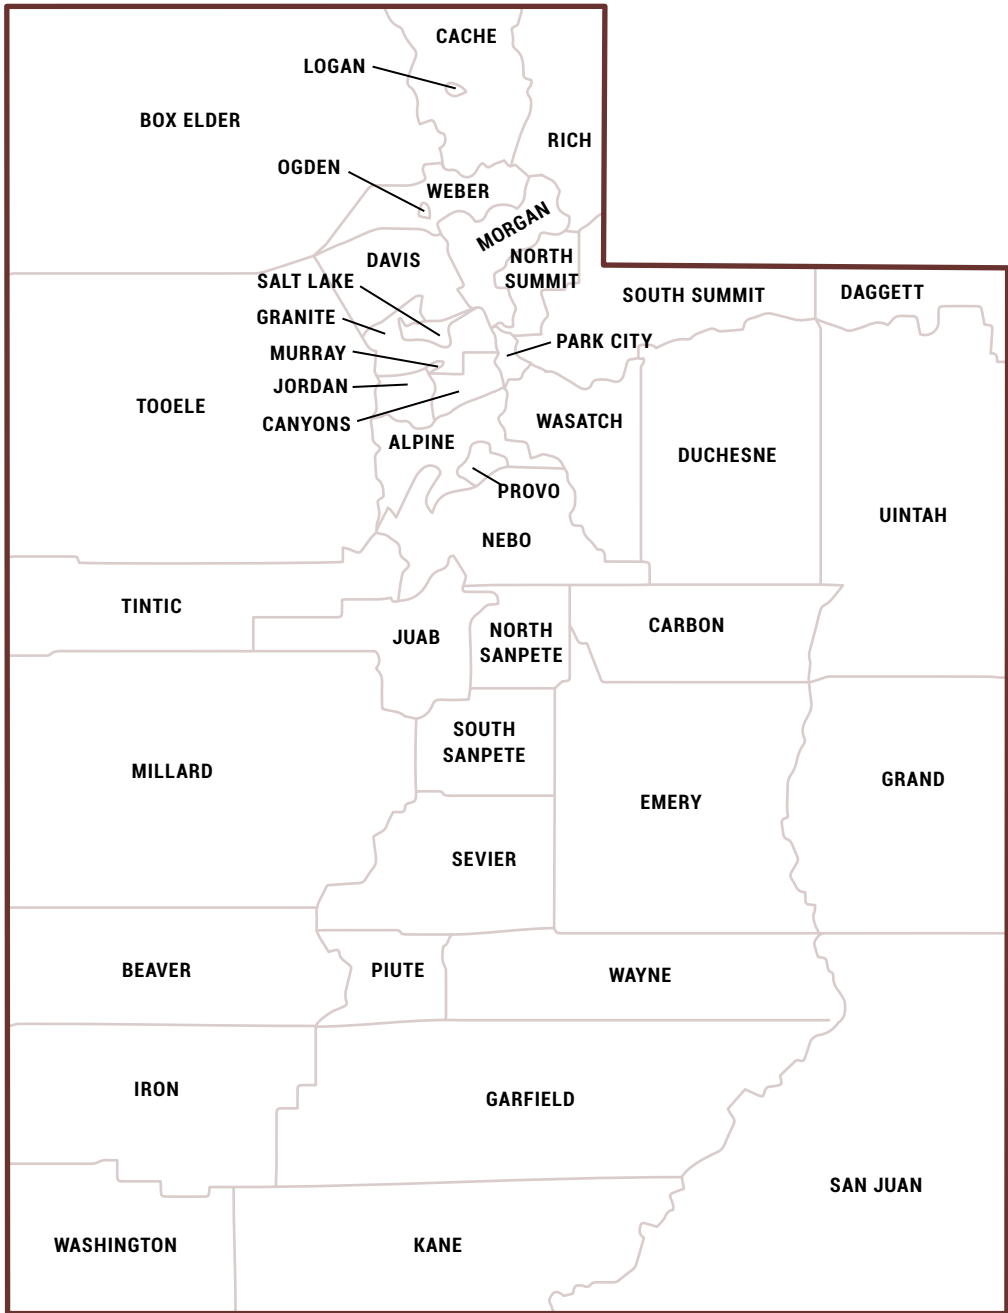

Alternative Service Models: The method schools or districts served school breakfast using an alternative serving model during the 2014–2015 school year is listed here. If your district information is incorrect, please notify the Utah State Board of Education Child Nutrition Programs so the system can be updated.

Marketing: The marketing strategy schools or districts used to promote school breakfast during the 2014–2015 school year is listed here. If your district information is incorrect, please notify the Utah State Board of Education Child Nutrition Programs so the system can be updated.

NA: Indicates no SBP operating at school.

Goal Met: School met goal of at least 70 percent of students on a free or reduced-price meal plan participated in SBP for every 100 students on a free or reduced-price plan that participated in lunch.

* Indicates schools that received a Breakfast Expansion grant from the Utah State Board of Education in 2013.

† Grouse Creek is a small, one-room school located in a rural community. Breakfast is served after the start of the school day, when food service staff arrive with it. The one room serves as the classroom and the cafeteria.

% F/R: Percentage of students in school or district eligible for free or reduced-price (F/R) meals based on reports from October 2014.

% F/R Students Participating in SBP: The number of students on a free or reduced-price (F/R) meal plan that ate school breakfast each day for every 100 students on a free or reduced-price plan that participated in lunch.

Rank: The order, from highest participation to lowest participation, schools and districts rank in school breakfast participation.

Additional Students Eating Breakfast: Number of additional students who would receive school breakfast at a free or reduced-price rate if the school was reaching 70 students at breakfast for every 100 students who received lunch at a free or reduced-price rate. The Food Research & Action Center has established that a successful School Breakfast Program (SBP) is one that reaches 70 low-income students for every 100 low-income students who participate in the National School Lunch Program.

Additional Federal Funding: The amount of additional federal dollars schools and districts would have received in the 2014–2015 school year if students who are on a free or reduced-price meal plan participating in school lunch also participated in the district's SBP.

Offer Breakfast at No Charge: The method schools or districts offering school breakfast to all students, free of charge, is listed here (2014–2015). If your district information is incorrect, please notify the Utah State Board of Education Child Nutrition Programs so the system can be updated.

Alternative Service Models: The method schools or districts served school breakfast using an alternative serving model during the 2014–2015 school year is listed here. If your district information is incorrect, please notify the Utah State Board of Education Child Nutrition Programs so the system can be updated.

Marketing: The marketing strategy schools or districts used to promote school breakfast during the 2014–2015 school year is listed here. If your district information is incorrect, please notify the Utah State Board of Education Child Nutrition Programs so the system can be updated.

NA: Indicates no SBP operating at school.

Goal Met: School met goal of at least 70 percent of students on a free or reduced-price meal plan participated in SBP for every 100 students on a free or reduced-price plan that participated in lunch.

* Indicates schools that received a Breakfast Expansion grant from the Utah State Board of Education in 2013.

% F/R: Percentage of students in school or district eligible for free or reduced-price (F/R) meals based on reports from October 2014.

% F/R Students Participating in SBP: The number of students on a free or reduced-price (F/R) meal plan that ate school breakfast each day for every 100 students on a free or reduced-price plan that participated in lunch.

Rank: The order, from highest participation to lowest participation, schools and districts rank in school breakfast participation.

Additional Students Eating Breakfast: Number of additional students who would receive school breakfast at a free or reduced-price rate if the school was reaching 70 students at breakfast for every 100 students who received lunch at a free or reduced-price rate. The Food Research & Action Center has established that a successful School Breakfast Program (SBP) is one that reaches 70 low-income students for every 100 low-income students who participate in the National School Lunch Program.

Additional Federal Funding: The amount of additional federal dollars schools and districts would have received in the 2014–2015 school year if students who are on a free or reduced-price meal plan participating in school lunch also participated in the district's SBP.

Offer Breakfast at No Charge: The method schools or districts offering school breakfast to all students, free of charge, is listed here (2014–2015). If your district information is incorrect, please notify the Utah State Board of Education Child Nutrition Programs so the system can be updated.

Alternative Service Models: The method schools or districts served school breakfast using an alternative serving model during the 2014–2015 school year is listed here. If your district information is incorrect, please notify the Utah State Board of Education Child Nutrition Programs so the system can be updated.

Marketing: The marketing strategy schools or districts used to promote school breakfast during the 2014–2015 school year is listed here. If your district information is incorrect, please notify the Utah State Board of Education Child Nutrition Programs so the system can be updated.

NA: Indicates no SBP operating at school.

Goal Met: School met goal of at least 70 percent of students on a free or reduced-price meal plan participated in SBP for every 100 students on a free or reduced-price plan that participated in lunch.

* Indicates schools that received a Breakfast Expansion grant from the Utah State Board of Education in 2013.

% F/R: Percentage of students in school or district eligible for free or reduced-price (F/R) meals based on reports from October 2014.

% F/R Students Participating in SBP: The number of students on a free or reduced-price (F/R) meal plan that ate school breakfast each day for every 100 students on a free or reduced-price plan that participated in lunch.

Rank: The order, from highest participation to lowest participation, schools and districts rank in school breakfast participation.

Additional Students Eating Breakfast: Number of additional students who would receive school breakfast at a free or reduced-price rate if the school was reaching 70 students at breakfast for every 100 students who received lunch at a free or reduced-price rate. The Food Research & Action Center has established that a successful School Breakfast Program (SBP) is one that reaches 70 low-income students for every 100 low-income students who participate in the National School Lunch Program.

Additional Federal Funding: The amount of additional federal dollars schools and districts would have received in the 2014–2015 school year if students who are on a free or reduced-price meal plan participating in school lunch also participated in the district's SBP.

Offer Breakfast at No Charge: The method schools or districts offering school breakfast to all students, free of charge, is listed here (2014–2015). If your district information is incorrect, please notify the Utah State Board of Education Child Nutrition Programs so the system can be updated.

Alternative Service Models: The method schools or districts served school breakfast using an alternative serving model during the 2014–2015 school year is listed here. If your district information is incorrect, please notify the Utah State Board of Education Child Nutrition Programs so the system can be updated.

Marketing: The marketing strategy schools or districts used to promote school breakfast during the 2014–2015 school year is listed here. If your district information is incorrect, please notify the Utah State Board of Education Child Nutrition Programs so the system can be updated.

NA: Indicates no SBP operating at school.

Goal Met: School met goal of at least 70 percent of students on a free or reduced-price meal plan participated in SBP for every 100 students on a free or reduced-price plan that participated in lunch.

* Indicates schools that received a Breakfast Expansion grant from the Utah State Board of Education in 2013.

% F/R: Percentage of students in school or district eligible for free or reduced-price (F/R) meals based on reports from October 2014.

% F/R Students Participating in SBP: The number of students on a free or reduced-price (F/R) meal plan that ate school breakfast each day for every 100 students on a free or reduced-price plan that participated in lunch.

Rank: The order, from highest participation to lowest participation, schools and districts rank in school breakfast participation.

Additional Students Eating Breakfast: Number of additional students who would receive school breakfast at a free or reduced-price rate if the school was reaching 70 students at breakfast for every 100 students who received lunch at a free or reduced-price rate. The Food Research & Action Center has established that a successful School Breakfast Program (SBP) is one that reaches 70 low-income students for every 100 low-income students who participate in the National School Lunch Program.

Additional Federal Funding: The amount of additional federal dollars schools and districts would have received in the 2014–2015 school year if students who are on a free or reduced-price meal plan participating in school lunch also participated in the district's SBP.

Offer Breakfast at No Charge: The method schools or districts offering school breakfast to all students, free of charge, is listed here (2014–2015). If your district information is incorrect, please notify the Utah State Board of Education Child Nutrition Programs so the system can be updated.

Alternative Service Models: The method schools or districts served school breakfast using an alternative serving model during the 2014–2015 school year is listed here. If your district information is incorrect, please notify the Utah State Board of Education Child Nutrition Programs so the system can be updated.

Marketing: The marketing strategy schools or districts used to promote school breakfast during the 2014–2015 school year is listed here. If your district information is incorrect, please notify the Utah State Board of Education Child Nutrition Programs so the system can be updated.

NA: Indicates no SBP operating at school.

Goal Met: School met goal of at least 70 percent of students on a free or reduced-price meal plan participated in SBP for every 100 students on a free or reduced-price plan that participated in lunch.

* Indicates schools that received a Breakfast Expansion grant from the Utah State Board of Education in 2013.
